

11. Point groups and crystal field theory

Outline only — this chapter is not yet written up. The section headings below show the material to be covered.

11.1. CRYSTALLOGRAPHIC POINT GROUPS

11.2. CHARACTER TABLES

11.3. SPLITTING OF ATOMIC ORBITALS

11.4. WEAK AND STRONG FIELD LIMITS

11.5. HYBRIDIZATION AND MOLECULAR ORBITALS
