

Group Theory and Its Applications

Yi Lu

Draft of September 9, 2026

Work in progress. These notes are written up as the course runs; several chapters are still an outline only, and nothing here has been through a careful revision. Corrections are welcome.

ACKNOWLEDGEMENT. These notes draw in part on a $\LaTeX$ transcription that Kong Shuo (孔硕), then a student on this course, made from the 2025 lectures and from my handwritten notes. His careful and unprompted work is used throughout the earlier chapters and is gratefully acknowledged.

Contents

Part I.

Groups

Part II.

Representation theory
